

DS Assignment 2 Changes

Tun-Hsiang Chou

October 3, 2024

Feedback

Good work. A considerable amount of effort has gone into testing. Also, the code is well documented.

Changes

- Enable `GETClient` to retry on errors (e.g., server not available).
- Add `clientRetryOnErrorTest` to verify the client can successfully retry a GET request and receive the correct data after the server is interrupted and restarted.
- Add execution steps to the README.
